

ACCESSORIES FOR INERTIA AND VIBRATIONS SENSORS

448

- Analysis card for inertia or vibration sensors
- Processing of sensor signals with adjustable alarm threshold and selectable NO-NC relay output
- 10-15 V DC power supply
- 2 mA consumption, 30 mA with excited relay
- Double adjustment range for operating sensitivity
- 2200 Ohm balanced line input
- Dimensions: 80 x 40 mm
- Equipped with adhesive supports for quick installation

1447 D

- To fasten inertia sensors to metal nets
- Material: white galvanized steel

ORDER CODES

Code	Description	Pcs./pack.	Package weight	Application
448	Analysis card for inertia sensors	2	0,12 kg	Series 444, 446, 1447, 2152, 473 B, 1107
1447 D	Mounting bracket for wire net	1	0,13 kg	Series 1447
